Auckland, New Zealand | NZ Citizen | Willing to relocate

Skills Summary

- React.js, Next.js, Vite.js, Typescript, HTML5, CSS3, JavaScript, Styled Components, Emotion/css
- React Storybook, Chromatic, Redux Toolkit, Redux Thunk, TanStack React Query, React Hook Form
- React Testing Library, Vitest, Jest, Material-UI, Astro.js, Bootstrap, REST API, GraphQL, CLI, Git
- Building CI/CD pipelines and releases/deployment using Azure DevOps, GitHub Actions
- Converting Figma/mock designs into responsive websites/web applications
- Experience in Express.js/Node.js backend, Sanity headless CMS, Stripe integration, WordPress CMS
- Dedicated, experienced and adaptable Frontend Developer with a strong foundation in problem-solving, critical thinking, and understanding the ever-evolving landscape of frontend development.
- Equipped with the resilience to tackle any new challenge, I thrive in dynamic environments and embrace the constant learning inherent in this field.
- My ability to learn and adapt ensures that I stay ahead of industry trends and deliver innovative solutions that meet the needs of today's digital landscape.
- I excel in building responsive websites/web applications, ensuring design principles, user experience, and cross-browser compatibility.
- Collaborative and skilled in Agile Scrum methodologies, I effectively gather requirements, design interfaces, and implement solutions that meet client and internal stakeholder needs.

Career History

Frontend Developer | HainesAttract | Auckland | Apr 2017 - Apr 2024

- **HainesLink:** A microservices architecture-based web application.

Rebuilt a web application with a modern architecture using React.js and its ecosystem from a heavily patched, hard-to-maintain legacy application.

- Created the frontend application (SPA) using React.js, including routes, pages, data tables, cards, create/edit modals, forms, validations, styled components, and more.
- Developed components library, custom React hooks, contexts, utility/helper functions.
- Developed modules covering user authentication, authorization, solutions, tasks, pricing, credits, client rates, invoices, offerings, vacancies, job listings, ATS integrations, approvals, and user portals with custom dashboards.
- Integrated with the Express.js/Node.js backend REST APIs to enable CRUD operations.

Tech used: React 17, features of ES6+, Formik, Yup, material-ui, CSS-in-JS, data grids, GraphQL, recharts, react-pdf, drag and drop, d3-tree, date and/or time pickers, webpack, etc.

- **WorkHere** (workhere.co.nz): A monolithic architecture-based web application developed as the interface connecting employers, candidates, and recruiters.
 - Created the frontend of the application from the ground up, utilizing ASP.Net, jQuery, SCSS, Bootstrap, SweetAlert, datatables, selectize.js, sortable, jQuery validation, jQuery Querybuilder, cropper.js, isotope.js, moment.js, and more.

Conducted extensive testing, debugging, and error handling for both frontend and backend applications.

- **HainesAttract** (hainesattract.co.nz): Created the website with Astro.js, Typescript and Bootstrap.
- **Static Websites:** Created numerous client websites, landing pages, and company campaigns by transforming Figma/mock designs into responsive websites using Bootstrap, SCSS, and JavaScript.

Developed contact forms that submit data to Google Sheets and send emails for most static websites.

Configured the CI/CD pipelines & releases in Azure DevOps, managed domain DNS records, and set up tags & triggers in Google Tag Manager for all the web applications & websites mentioned above.

- **HubSpot CMS:** Created dynamic UI component modules, forms, templates, global contents, menus and customised the pages.
- **Teamtaylor web applications:** Customised the global/specific styles and JavaScript for all the campaigns/job templates/pages

Collaborated extensively with cross-functional teams to gather requirements, design user interfaces, and implement solutions that meet the needs of clients and internal stakeholders.

Tools Used: Microsoft Azure, VS Code, Visual Studio, Azure Data Studio, Git Extensions
